To.

The Principal,

CMRCET,

Kandlakoya (V),

Medchal Road,

Hydrabad-50140.

Dear Sir,

**Sub:** Requesting permission to conduct anICT/LMS event on 14/10/2017

I Dr.K.L.S. Soujanya, professor of CSE department and convener of the ICT/LMS, earnestly requesting your permission to conduct "Awareness program on Open Source LMS Tools".

a) Date of Event: 14/10/2017
b) Name of event: "Awareness program on Open Source LMS Tools"by ProfessorDr. K. Rama Krishna, to create awareness among the faculty regarding MOOC.
c) Venue of event: CMRCET Auditorium Block - II
d) Target audience: Faculty
e) Resources required from college – Auditorium
f) Amount Required : Enclosed
g) Faculty and staff involved in the event :list enclosed

I request you to grant me permission and do the needful.

Thanking you.

Yours sincerely

K.L.S. Soujanya

(Dr. K. L.S.Soujanya)

## REPORT WRITE UP OF THE PROGRAM

### Report of One day Awareness program on Open Source LMS Tools

As part of a wakeup call to all students of CMR College of Engineering and Technology "Awareness program on Open Source LMS Tools" *is conducted on 14th October, 2017.*

The educational institutions providing Engineering education in India are churning out about >800000 Engineering graduates annually.Educational platforms (Learning Management Systems – LMS) are innovative tools which educational institutions should not be without today. They help to create, adopt, administer, distribute and manage all of the activities related to e-learning training, or can act as a complement to classroom learning. When applied, this technology makes the classroom experience much more powerful, because 21st century educational methodologies have changed into those which are much simpler, more personalized, interactive and experiential.Going even further, Learning Content Management Systems (LCMS) make the management of everything related to learning much more comprehensive, personalized, of a high quality and enhanced through the use of virtual classrooms and multimedia content.Offering teachers and students a Virtual Campus, personalized and unique, is what makes LMS classrooms a success in education and learning experiences.LMS are not only a web space for learning, but they make learning a real experience

The reasons for implanting LMS

1. LMS is a piece of software which is easy to implement. It brings together under one platform all academic programs, subject study guides and training,.
2. For a student community to perform or function well, it needs efficient access to information. Classrooms or virtual campuses act as support and a channel of communication, for teachers and students alike.
3. It's a structured technology whose objective is to make the lives of users much easier . An intuitive tool which doesn't require training or a manual; students and teachers alike can take to it like a duck takes to water. LMS are easy to learn how to use, including using new tools or features which you may not have used previously.
4. It's possible to access the LMS from anywhere with an internet connection from any device, be it a computer, smartphone or tablet. If a teacher needs to give a revision class they can connect with all the students through a virtual classroom, or if a student is away on holiday or travelling they can access the class content and exercises anywhere.
5. Educational platforms allow complete personalized access to all members of its community, just like the support received in a classroom environment. In these comprehensive virtual campuses it is easy for all users to find the communication tools they need, such as those for making presentations or resource mapping, internally or from the internet. Reliability is ensured.
6. Having all information in the same place is a strong argument for using an LMS, avoiding loss of data and information and making it available to all users in one place. Educational platforms allow the complete management of everything related to teaching, saving time and money.
7. It gives the simplicity and efficiency provided in all processes, teachers and students can exploit the most of the online learning process with an LMS.

8. LMS are not only a virtual space created for learning, but make learning a more complete experience.

The resource person of the a seminar was the professor Dr.K Rama Krishna.The Seminar was presided over by the principal of the college Dr V.A.Narayana expressed the importance of LMS Tools. The introductory remarks were made by the IQAC Coordinator of the college Professor Deevadas, all the HODs and faculty members were participated of this Program. Dr.K.Vijayakumar Hod of CSE highlighted on the importance Learning management system tools used in the institute and how these tools enhance the teaching leering process.
The program aim to create awareness on Open source lms tools in the market, in the question hour faculty ask the speakers queries.

The feedback obtained from the faculty revealed that:

1.The program was good.

2. use of lms and how these useful in teaching learning.

3.Theyexpressed to conduct workshops/ seminars of this kind.

**Outcomes:**
Participants understand the use of LMS tools in their carrier and professional life.
