(57) Abstract :
Exemplary embodiments of the present disclosure are directed towards An electronic waste management system, comprising a first computing device comprising an electronic waste management module configured to collect an electronic waste information from a first user, the electronic waste management module configured to store the collected electronic waste information in a central database over a network, the electronic waste management module configured to sell an electronic waste by the first user; a second computing device comprising the electronic waste management module configured to purchase the electronic waste by a second user over the network to increase the efficiency and to help the community to reduce the electronic waste.
