**Strategic Perspective Plan for the Academic Year 2017-18**

Sl. No.	Date of the Event	Dept./Club	Name of the Event	Budget for the event	Details
1	10-8-2017	Niruja Health Club	Awareness program on Typhoid fever	-NIL-	Due to seasonal variations, contaminated food and water typhoid fever occurs, and also due to the rise of the cases in recent times it is very much necessary for conducting an awareness program for the students on the same.
	25-11-2017	Niruja Health Club	Awareness campaign on fluorosis	5000/-	Fluorosis decades old serious issue still not gone out of roots in some parts of Telangana, So Niruja Health club decided to conduct an awareness campaign on fluorosis to any one of the affected village and make aware the how to drink the fluorinated water by suitable water treatment method
3	03-01-2018	Niruja Health Club	World Mental Health Day	-NIL-	Sound Mind makes Healthy body. With respect to the above statement Niruja Health club is going to organize awareness program on importance of mental health to the students there-by make them to be a part of strong and healthy nation.
4	02-02-2018	Niruja Health Club	Awareness program on Unconsciousness	-NIL-	Fainting dizziness and unconsciousness though looks to be smaller issues if not taken care they turn into big mishap. So to make students aware of the ailments caused by it is better to conduct an awareness program on the same
5	19-03-2018	Niruja Health Club	Awareness program on Fits	-NIL-	Fits can be caused by many factors like depression, mental illness, genetic etc., In most of the cases if we know how to perform the first aid we can save the life of the person affected with fits. So Niruja Health club is planning to conduct an awareness program to the students for the same.

## Niruja HealthClub - Strategy Document

## REPORT ON TYPHOID FEVER AWARENESS PROGRAM

Niruja Health club has conducted the Awareness program on Typhoid fever at CMR College of Engineering & Technology EEE seminar Hall block II on 10-08-2017. Dr. David has acknowledged faculty staff and students on many aspects of Typhoid fever and its symptoms. He said that typhoid fever is a systemic infection caused by *Salmonella Typhi*, usually through ingestion of contaminated food or water. The acute illness is characterized by prolonged fever, headache and nausea, loss of appetite, and constipation or sometimes diarrhoea. Symptoms are often non-specific and clinically non-distinguishable from other febrile illnesses. However, clinical severity varies and severe cases may lead to serious complications or even death. It occurs predominantly in association with poor sanitation and lack of clean drinking water. Three typhoid vaccines are currently recommended for use by:

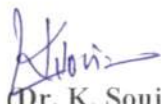

An injectable typhoid conjugate vaccine (TCV), licensed for children from 6 months of age and adults up to 45 years of age; An injectable unconjugated polysaccharide for persons aged two years and above; and An oral live attenuated Ty21a vaccine in capsule formulation for those over six years of age. By keeping surroundings clean, drinking safe water one can get away from typhoid fever.

### OUTCOME:

After conducting the awareness program; students, faculty and staff has come to know in details about typhoid fever, symptoms and its related vaccination.

**BENEFICIARIES:** One hundred and ten Students; ten faculty and five staff have come to know about the typhoid fever its symptoms and treatment methods.

### REPORT ON MENTAL HEALTH DAY PROGRAM

Niruja Health Club has conducted the Awareness program on account of world Mental Health day at CMRCET EEE Seminar Hall Block-II on 03/01/2018. Dr .David has given his valuable speech on the importance of mental health to the students, staff and faculty who were present. He spoke about the importance of world mental health day .He also said that Good mental health is related to mental and psychological well-being. It aims to improve the mental health of individuals and society at large includes the promotion of mental well-being, the prevention of mental disorders, the protection of human rights and the care of people affected by mental disorders. World Mental Health Day was observed for the first time on 10 October 1992. It was started as an annual activity of the World Federation for Mental Health. Its aims were general ones of promoting mental health advocacy and educating the public on relevant issues. He also spoke on the theme of World Mental Health Day 2019 i.e. **focus on suicide prevention**. According to WHO, more than 800,000 people die by suicide a year, making it the principal cause of death among people 15 to 24-year-olds. Nowadays people experience enormous stress due to study, strained financial conditions, workplace and tensed relationships, resulting in mental health as emerging widespread disease making. As a result students, faculty and staff got enlightened with his speech.

**OUTCOME:** After conducting the awareness program the students, faculty and staff has gained a lot of knowledge on what is mental health and also how to keep oneself mentally healthy.

**BENEFICIARIES:** One hundred Students; twenty faculty and staff have gained a lot of experience from the awareness program on mental health.

## REPORT ON AWARENESS PROGRAM ON UNCONSCIOUSNESS

Niruja Health Club has conducted the awareness program on Unconsciousness at CMR College of Engineering and Technology EEE Seminar Hall Block-II on 02-02-2018. Dr. David has enlightened the students, faculty and staff on many aspects on unconsciousness. Unconsciousness is a state which occurs when the ability to maintain an awareness of self and environment is lost. Brief unconsciousness or fainting is often a result from dehydration, low blood sugar, or temporary low blood pressure. It involves a complete or near-complete lack of responsiveness to people and other environmental stimuli. Loss of consciousness should not be confused with the notion of the psychoanalytic unconscious or cognitive processes for example, implicit cognition, that take place outside awareness, and with altered states of consciousness, such as delirium, normal sleep, hypnosis, and other altered states in which the person responds to stimuli. Unconsciousness may occur as the result of traumatic brain injury, brain hypoxia that occurs due to a brain infarction or cardiac arrest, severe poisoning with drugs that depress the activity of the central nervous system like alcohol and other hypnotic or sedative drugs, severe fatigue, anaesthesia, and other causes. He also mentions about dos and don'ts if any one sees an unconscious persons

### DOS:

- Check whether the person is breathing. If they're not breathing, have someone call your local emergency services (100,108) immediately and prepare to begin CPR. If they're breathing, position the person on their back.
- Raise their legs at least 12 inches above the ground.
- Loosen any restrictive clothing or belts. If they don't regain consciousness within one minute, call your local emergency services.
- Check their airway to make sure there's no obstruction.
- Check again to see if they're breathing, coughing, or moving. These are signs of positive circulation. If these signs are absent, perform CPR until emergency personnel arrive.
- If there's major bleeding occurring, place direct pressure on the bleeding area or apply a tourniquet above the bleeding area until expert help arrives.

### DO'NTS

- DO NOT give an unconscious person any food or drink.
- DO NOT leave the person alone.
- DO NOT place a pillow under the head of an unconscious person.
- DO NOT slap an unconscious person's face or splash water on their face to try to revive them.

### PREVENTION OF UNCONSCIOUSNESS

- To prevent becoming unconscious or fainting:
- Avoid situations where your blood sugar level gets too low.
- Avoid standing in one place too long without moving, especially if you are prone to fainting.

- Get enough fluid, particularly in warm weather.
- If you feel like you are about to faint, lie down or sit with your head bent forward between your knees.
- If you have a medical condition, such as diabetes, always wear a medical alert necklace or bracelet.

#### **OUTCOMES:**

After conducting the awareness program students, faculty staff has come to know the Unconsciousness and how to treat if any one come across with the symptoms of the same.

#### **BENEFICIARIES:**

One hundred and twenty Students; twenty faculty and fifteen staff have gained a lot of experience from the awareness program.

## REPORT ON AWARENESS PROGRAM ON FITS (SEIZURES)

Niruja Health Club has conducted the awareness program on good sleep at CMR College of Engineering and Technology auditorium on 19-03-2018. Dr.David gave his valuable speech on fits its symptoms, first aid to students, faculty and staff. He said that a fit can be a brief moment when the person appears to be "absent" from what is going on around them, or jerking/twitching of a hand, arm or leg or jerking/twitching affecting the whole body. They may or may not become unconscious. Fits (seizures) have a variety of causes, and most fits will not be due to a brain tumour. It can be caused by something interrupting the electrical activity in the brain which are often sudden and dramatic. This leads the muscles in the body to contract uncontrollably and usually causes the person to lose responsiveness. It's also known as a convulsion or fit. Fits occurring for the first time should be viewed as a potentially serious symptom, and require further investigation of the cause. In children fits can be due to a serious illness and any child having a first fit must be reviewed as soon as possible by a doctor. In adolescents fits along with high temperature (febrile fit/seizure) can be seen. In adults, seizures are the most common symptom of epilepsy, but they can be caused by other things, such as a head injury, alcohol poisoning or someone with diabetes having a 'hypo' when their blood glucose is too low. He also mentioned about the symptoms, Dos and don'ts.

### SYMPTOMS:

- Sudden loss of responsiveness
- Rigid body with an arching back
- Noisy difficult breathing
- Convulsions (jerky uncontrolled movements)
- Loss of bladder and bowel control

### DOS

- Call 108 or 104 for medical help
- Don't restrain or move them.
- Protect them from hurting themselves. Clear away any potentially dangerous objects, like hot drinks or sharp objects.
- Protect their head by placing something soft underneath it, like a towel, and loosen any clothing around their neck.
- Once the seizure has stopped, they may fall into a deep sleep. If they're breathing, put them in the recovery position.

### DONTS:

- Do not hold the person down or try to stop his or her movements.
- Do not put anything in the person's mouth. This can injure teeth or the jaw. A person having a seizure cannot swallow his or her tongue.
- Do not offer the person water or food until he or she is fully alert.

#### **OUTCOMES:**

After conducting the program students, faculty and staff have come to know about the fits, its symptoms and how to respond if any one encounters with such a person.

#### **BENEFICIARIES:**

One hundred and ten Students; fifteen faculty and eight staff have gained a lot of experience from the awareness program.

**Subject:** Summary of Programs Conducted during A.Y 2017-18 under Niruja HealthClub.

S. No	Name of the Event	Date	Venue	Conducted / Not Conducted
1	Awareness program on Typhoid	10-08-2017	CMRCET EEE Seminar Hall Block - II	Conducted
2	Awareness campaign on fluorosis	25-11-2017	Bhatlapally village, Nalgonda Dist	Not Conducted
3	World Mental Health Day	03-01-2018	CMRCET EEE Seminar Hall Block - II	Conducted
4	Awareness program on Unconsciousness	02-02-2018	CMRCET EEE Seminar Hall Block - II	Conducted
5	Awareness program on Fits	19-03-2018	CMRCET EEE Seminar Hall Block - II	Conducted

**Reason for the Non Conduction of the event:** Awareness Campaign on Fluorosis at Bhatlapally village Nalgonda District was scheduled on 25<sup>th</sup> November 2017. Due to a tight schedule of the student volunteers because of their exams the campaign has been skipped from the conduction. We deeply regret this inconvenience and would reschedule it in a better way.
