Seminar Program on Empowering Engineering Students through Employability Skills

EQUAL OPPORTUNITIES CENTRE (EOC) had organized Seminar on “Seminar Program on Empowering Engineering Students through Employability Skills” on 27th August.2022 for the B. tech students at seminar hall, Dept of civil, CMRCET. The objective of this seminar was to develop the students spiritually and build self-confidence, enhance self-esteem and improve overall personality. The programme aimed at grooming the students through sensitizing them about proper behavior, socially and professionally in both formal and informal circumstances. Prof. B Srinivas were the resource persons on this special event.

Addressing the gathering Prof. Srinivas spoke on life skills. Life skills are abilities for adaptive and positive behavior that enables humans to deal effectively with the demands and challenges of life.

Seminar Program on Empowering Engineering Students through Employability Skills

A professional course program like engineering strives to get the maximum number of its students placed through campus interviews. While communication skills have been added in all the engineering courses with the aim to improve their performance in placement, the syllabus mostly concentrates on the development of four language skills. The students are not made aware of the employability skills and their significance. This essay intends to enlist the importance of skills and why students need to be aware of the skills they possess and how they can work on packaging their candidature around a few skills. The author concludes that the combination of both employability skills along with an engineering degree should ensure students meet the high expectations of the employers. Presiding over the function, Ch Gopal Reddy garu, Secretary & Correspondent, CMRGI exhorted the students to make use of the training offered by the College to prepare themselves to get employment in Corporates.

The students are expected to be ready to enter the industry. Yet, expectations from the multinational companies and growing competition have led to students' anxiety and failure in acquiring a job. In the rat race, individuality is often lost and students with technical training and average competencies dominate the list of degree holders. These engineers are assessed in interviews as the employers want to select people who are potential leaders and innovators, those who can change the shape of the world with their ideas and business acumen. Major Dr V A Narayana, Principal and trainer in his key note address said that a candidate must show various skills like communication, aptitude, attitude, computer skills etc. apart from curriculum. He is expected to show decent corporate etiquette at the time of interview itself, and hence training becomes very vital for graduates.

Outcomes:

The combination of these skills along with an engineering degree will ensure that students meet the high expectations of the employers. In an era of rapid change and fierce competition, their efforts to learn new things and acquire certain skills will not only make them confident and self-assured, but will also give them an advantage in the job interview. Employers clearly look forward to candidates who are focused and are passionate about the profession they aspire to enter; therefore, making an effort to hone their attributes can definitely improve their job prospects. Thus, the onus now is on academia to understand the needs of the industry and students by creating awareness and guiding the students in self-analysis and in acquisition of skills.

Report on personality Development

EQUAL OPPORTUNITIES CENTRE (EOC) had organized Seminar on “Personality Development” on 10th December, 2022 for the B. tech students at seminar hall, Dept of civil, CMRCET. The objective of this seminar was to develop the students spiritually and build self-confidence, enhance self-esteem and improve overall personality. The programme aimed at grooming the students through sensitizing them about proper behavior, socially and professionally in both formal and informal circumstances. Prof. GopalNaik were the resource persons on this special event.

Addressing the gathering Prof. Naik spoke on life skills. Life skills are abilities for adaptive and positive behavior that enables humans to deal effectively with the demands and challenges of life. He spoke about SWOT (strengths, weakness, opportunities and threats also called as challenges in today’s life) analysis and ask the students to do SWOT analysis of themselves. Through this analysis one can realize about their inner qualities i.e. strengths and weaknesses. Everyone has different qualities and has own uniqueness. So there is a need of push up to bring a good change.

Major. Dr. V. A. Narayana Principal said, “Time management is setting priorities and taking charge of the situation and time utilization”. He advised the students to spend every second in an efficient and productive way. He highlighted the major source of time management problems and solutions to them. IQAC Coordinator of the college Prof Devadas added that a ‘smile’ can lead a person towards success. It was a great day of learning and exposure about personality development which would help the social work students to bring change within themselves and among people.

Outcomes:

Participants understand the use of skills in their carrier and professional life.

Report on Awareness program on Entrepreneurship and incentives provided by state government

The objective of the Equal opportunity Cell is to help and empower the students. In this connection Equal Opportunity cell made an attempt create awareness about the financial assistance for the students in their career. On 25th February, 2023 Equal opportunity cell of CMRCET organized an awareness program on Entrepreneurship and incentives provided by state government.

Departmental schemes was required to look after only the welfare of SC/ST population of our State but with the reorganization of OBC as a separate group of population, welfare activities relating to OBC, which forms quite big chunk of the population, was also assigned to this department. Welfare activities relating to Minorities was also assigned to this department but in 2022-23 it (activities relating to minorities) was transferred to Revenue Department.

A student is allowed to avail the scholarship either under the State Scheme or Centrally Sponsored Scholarship Scheme, whichever is beneficial to him/her but can apply only under one scheme. The Department for the Welfare of S/ST/OBC/Minorities is implementing this scheme through DSFDC.

Dr Y S Reddy Assistant professor of CBIT, Hyderabad spoken on this occasion about the proper utilization of central and state schemes to explain for the benefits of the students.

Major Dr V A Narayana principal of CMRCET spoken on this occasion with the students how the scholarship given by the Govt benefits to melt their financial requirement using the Govt schemes.

In the absence of financial resources many students from backward and economically weaker sections of the society are not in a position to pursue higher education. In order to support students from these deprived communities, government and other agencies make scholarships available to the needy students. Thus such programs have to be conducted on a regular basis

Entrepreneurial activities, that include the creation of new firms and the creation and distribution of value assuming the calculated risks, have been associated with economic growth, employment generation, innovation, the acceleration of structural changes, the improvement of the competitive position of a nation and an increase in national productivity. Start-ups do not resist change, they are flexible and innovative.
